 Learning Paths Instructor-led Training Certification

Free Live Onboarding Training

Getting started on Databricks is now easier than ever!

Build a strong lakehouse foundation with Databricks training and certification to demonstrate your competence and accelerate your career.

To help all data, analytics, and AI practitioners build a strong lakehouse foundation to demonstrate their competence and accelerate their careers, Databricks is now offering free onboarding training with live instructors multiple times a day across regions for data, AI, and analytics professionals, such as: data engineers, data analysts, machine learning engineers, and platform administrators.

If on-demand learning works better for you, self-paced versions of these courses are also available on [Databricks Academy](#) at no cost to prospects, customers, and partners.
